

Information Security Policy

GPA is committed to the security of documents and data under our control and the assessment and treatment of information security risks directly or indirectly related to our processes, products and services.

Accordingly, we will:

- Comply with relevant information security legislation and regulations, and any relevant customer requirements;
- Educate, train and provide sufficient resources, including identifying clear roles, responsibilities and authorities, to our employees as well as, where appropriate, to sub-contractors and visitors, so that all relevant parties understand information security issues and the effect of their activities on information security;
- Monitor, through operational and management review meetings, and systematic auditing, our information security performance towards established objectives;
- Develop and maintain operational procedures to minimise and handle any information security issues, should they occur;
- Identify information security requirements and results from risk assessment and risk treatment;
- Continually improve our information security processes and procedures.

To achieve our information security objectives, we have implemented an Integrated Management System, which includes information security management system requirements in accordance with ISO 27001:2013.

Management supports this Information Security Policy and the integrated management system that has been developed. It is the responsibility of all employees to ensure it is understood, implemented and maintained at all levels within the Company.

Sean Flaherty
Managing Director
